## REACHING A MILESTONE: KLOTZ DIGITAL SUPPLIES 350TH DIGITAL AUDIO MIXER IN THE USA

**Las Vegas/NAB Booth N2807, April 2005** – KLOTZ DIGITAL today announced that it sold its 350<sup>th</sup> digital audio mixing console in the US. To date KLOTZ DIGITAL has over 3000 platform systems and more than 1250 surfaces with over 4000 console modules in service throughout the world. The console is a VADIS D.C.II radio on-air console and is destined for Radio One in Lanham, MD. Radio One is the nation's largest radio broadcaster that targets primarily African-American urban listeners.

The shipment of the 350<sup>th</sup> digital console represents another major milestone for KLOTZ DIGITAL Audio Systems Inc. in that this has been achieved in a mere 7 years since KLOTZ DIGITAL established its US subsidiary in Norcross, Georgia.

“Citadel Communications (Buffalo/New York) and Capstar Communications (now Clear Channel Tucson, AZ) were among the first broadcasting companies to install our products in the US.” says Karl Schoning, President of KLOTZ DIGITAL Audio Systems Inc. “I am very happy and extremely proud of this achievement. My goal is to keep KLOTZ DIGITAL Audio Systems on the road of success. The introduction of Workflow Management Software Tools for VADIS at the NAB 2005 and our established range of AEON and VADIS D.C.II consoles, are further proof that we are leading the market.”

###
