## **KLOTZ DIGITAL UPGRADES CHRISTIAN RADIO STATIONS IN POLAND WITH AEON AND XENON CONSOLES**

**Munich/Warsaw, August 2009** – KLOTZ DIGITAL recently supplied XENON and AEON mixing consoles to church affiliated radio stations in Poland: Radio Victoria in Lowicz, and Radio Nadzieja in Lomza, received an AEON each; while Radio PLUS's broadcast facility in Radom was equipped with XENON. All projects were realized by ProfiAudio Ltd., KLOTZ DIGITAL's Polish sales and service partner.

All three radio stations are focused on the region where they are located and broadcast local news, mainstream music, and evangelization to the catholic community. Often their program includes recorded material and feedings from the play-out system without operator assistance. Operators and journalists mainly present news, some life programs, and religious broadcasts; e.g. live recordings from the holy mass at the next cathedral and at similar occasions. Radio PLUS in Radom, for example, even broadcasts from the local church's seminar campus.

“KLOTZ DIGITAL's smaller mixing consoles, XENON and AEON, are just the solution Christian radio stations of similar size to Radio PLUS need. They make the advantages of digital broadcast technology accessible to everyone, and fit our requirements perfectly”, explains Jacek Wieczorek – priest and director of Radio PLUS. “Both AEON and XENON console types are very economical solutions, offering all necessary interfaces and automation via GPIO. Since DJs and presenters in smaller Christian radio stations sometimes are laymen, and quite often young radio enthusiasts just beginning their careers, KLOTZ DIGITAL offers the perfect gear. The surface of each mixing console is clearly arranged, easy to operate, and not over- engineered. For us, XENON is the right choice for the hot hours of self-operation activity in real contact with radio listeners.”

###

**KLOTZ DIGITAL AG** of Munich, Germany is the world leader in AudioMedia Platform Technology. KLOTZ DIGITAL manufactures a variety of digital audio mixing consoles, the VADIS AudioMedia Platform, and VARIZONE systems for music distribution, paging and safety announcement installations. KLOTZ DIGITAL has almost 20 years experience in manufacturing and installing digital radio consoles and audio infrastructures. In fact, KLOTZ DIGITAL has over 1250 digital radio consoles and more than 2000 VADIS frames in service today.
